

Coconut Rice Pudding

INGREDIENTS

- 1 cup pudding rice
- 2 cups coconut milk
- 2 cups coconut water
- 1 tbsp agave syrup
- 1 tsp vanilla

METHOD

- Rinse the rice under cold running water for a few minutes
- Put the rice, vanilla, agave and one cup coconut milk in a saucepan over a medium heat
 - Cook, stirring often till almost all the liquid is absorbed
- Pour in the second cup of coconut milk and again, cook till almost all the liquid is absorbed
- Repeat the process with the coconut water, one cup at a time
- By the time all the liquid is absorbed it will be deliciously creamy. I topped it with unsweetened desiccated coconut and fresh coconut pieces and of course served it in my @coco.bowlz natural coconut bowl
